Can industrial battery energy storage systems be economically feasible in Brazil? A literature review demonstrated that this paper is a pioneer in demonstrating such a high level of economic feasibility for industrial battery energy storage systems in Brazil. One year of primary data from the industry (historical load demand series) is made available through a GitHub repository so that results can be replicated.

1. Introduction Are energy storage products coming to Brazil? Holu's Costa observed batteries were prominent during the Intersolar South America trade show held in São Paulo at the end of August. She added, hundreds of manufacturers are bringing energy storage products to Brazil. Can Brazil be a big battery storage country? With well-designed policies and regulations, Brazil has significant potential to follow in the footsteps of jurisdictions like California and Chile for large-scale battery storage, Germany for distributed and large-scale storage, and Australia for both pumped hydro and large-scale battery systems. Can foreigners invest in battery storage businesses in Brazil? Investment, incentives and taxation scenarios According to Brazilian law, there are no legal restrictions on direct foreign investment in the battery storage businesses or in the power sector (except in very specific segments or sectors of the economy). Could pumped hydro be the missing piece in Brazil's energy system? Conclusion Although energy storage solutions have yet to be widely deployed in Brazil, generation flexibility remains a scarce commodity. Therefore, storage projects, including pumped hydro, could be the missing piece needed to enhance the country's energy system. What are the different types of Industrial Electricity pricing in Brazil? 3.1. Systems sized for one-day operation 3.1.1. Project's gross revenue In Brazil, there are two main categories of industrial electricity pricing: green tariff and blue tariff. The blue tariff is analyzed in this paper since it allows for different contracted demands in the off-peak and peak periods. With global battery prices having fallen 85% between 2017 and 2020 and further since 2020 - Brazilian home, business, and industrial electricity users are considering energy storage systems. The conditions are in place for the country's battery energy storage market to expand at a compound annual growth rate (CAGR) of 20% to 30%, as Holu Solar's Sophia Costa explained. From ESS News Brazilian energy suppliers raised the red flag in September 2020, signaling a rise in electricity costs. The Brazil Energy Storage Market accounted for \$XX Billion in 2020 and is anticipated to reach \$XX Billion by 2025, registering a CAGR of XX% from 2020 to 2025. Transmission system operator (TSO) ISA CTEEP in Brazil has launched a 30 MW battery energy storage system. Although the location was not optimal, flexible generation and correlated solutions, including battery energy storage systems (BESS), are therefore likely to be at a premium in the future. Accordingly, in this article we delve into some key themes regarding the development and exploitation of battery storage solutions in Brazil. The Brazil Battery Energy Storage Systems (BESS) market in the first quarter of 2021 is characterized by robust growth driven by the country's expanding renewable energy sector. Significant investments in Battery Energy Storage Systems in Brazil are expected, especially with the announcement of the Economic analysis of industrial energy storage systems in Brazil: This paper proposes a methodology for stochastic economic analysis/optimization of industrial battery energy storage systems in Brazil or other regions with a
