

energy storage welding torch

The Stored Energy welding power supply - commonly called a Capacitive Discharge Welder or CD Welder - extracts energy from the power line over a period of time and stores it in welding capacitors. Thus, the effective weld energy is independent of line voltage fluctuations. Capacitor Discharge Stud Welding Equipment ExplainedThe capacitive discharge stud welding system comprises three primary components: a power supply, a controller, and a welding torch. For CE 4m Capacitor Discharge Energy Storage Arc Stud Embracing the future, we offer state-of-the-art laser welding and robotic welding solutions.
