

## georgia energy storage new energy plant operation

Will Georgia Power build a battery energy storage system? Georgia Power has started construction on four battery energy storage systems across the state. The projects will add 765 megawatts of generating capacity, enough to power approximately 573,750 homes. Two facilities will be built near Air Force bases, one at a retired coal plant, and another will expand an existing facility. How many MW of new battery energy storage will be available? An additional 1,000 MW of new battery energy storage is expected to be procured in the coming years through competitive bidding processes and a 13 MW demonstration project is in development at Fort Stewart Army Installation near Savannah, Georgia. Does Georgia Power support Customer-Sited solar? Georgia Power is also committed to supporting customer-sited generation resources to meet the state's growing energy needs. The IRP includes two customer expansions of BESS programs including enhancements to the Customer Connected Solar Program and launching a new Customer-Sited Solar Plus Storage Pilot. What does Georgia Power do?" At Georgia Power, we work with the Georgia PSC and many other stakeholders to make the investments required for a reliable and resilient power grid, integrating new technologies to better serve our customers today and as Georgia grows," said Rick Anderson, senior vice president and senior production officer for Georgia Power. Where are Georgia's Cares solar facilities located? The five solar facilities will be located across Georgia, including Mitchell County, Coffee County, Wilkinson County, Jefferson County and Laurens County. Georgia Power said the CARES RFP, also approved in the IRP Final Order, was recently issued with bids due in August. How does Georgia Power work with the Georgia PSC? Georgia Power continues to work with the Georgia PSC to procure and develop BESS projects across Georgia. Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. Georgia Power announced today that construction is underway on 765-megawatts (MW) of new battery energy storage systems (BESS) strategically located across Georgia in Bibb, Lowndes, Floyd and Cherokee counties. The BESS projects were authorized by the Georgia Public Service Commission (PSC) through The Georgia Public Service Commission last week approved five new power purchase agreements (PPAs) for Georgia Power, adding more than 1,000 megawatts (MW) of utility-scale solar capacity across the state. The projects, totaling 1,068 MW, were selected through the company's Clean and Renewable Georgia Power leaders joined elected officials from the Georgia Public Service Commission (PSC), Georgia legislature, and Talbot and Muscogee counties on Thursday to mark commercial operation of the company's first "grid-connected" battery energy storage system (BESS). The Mossy Branch Battery Georgia begins construction on 765 MW battery Georgia Power has embarked on an ambitious initiative to enhance the state's energy infrastructure by commencing the construction of Utility company announces next-gen facilities capable Georgia Power recently announced that construction is
