How do you use energy storage devices in Genshin Impact? Players must collect three Energy Storage Devices and use them on three different Terminals to remove the barriers blocking the Research Terminal. The step is quite simple and easy to follow as the Research Terminals are marked on the map in Genshin Impact. How do I activate all the energy storage terminals? So, let's see what steps you need to take to activate all the terminals: Research Terminal #1: Take the first Energy Storage Device and move forward and to the right. You'll have practically no other options, so you'll know where to go right away. How do you find the last energy storage device? Place the energy storage device near it and break the second seal, which will open more paths. Once that is done, go back to your original spot to pick up the last device. After collecting the third energy storage device, go straight and turn left at the end. You will find the last research terminal near a broken mine car. How do you remove energy storage barriers? There are three barriers that players can remove in a specific order, which are right, left, and then the one in the middle. First, approach one of the Energy Storage Devices and press Pick Up. Quickly run straight ahead then turn right. How do I find the energy device? You must first pick up the Energy Device on the left, which is hidden behind a Geode. As soon as you pick up the Energy Device, the timer will start, and you need to find the corresponding terminal within the time limit. Avoid the floating circles as they will reduce the timer by 30 seconds. Follow this exact path to find the terminal. With the global energy storage market already worth \$33 billion annually [1], dark energy tech could be the ultimate game-changer. But how do you actually get your hands on one of these cosmic batteries? With the global energy storage market already worth \$33 billion annually [1], dark energy tech could be the ultimate game-changer. But how do you actually get your hands on one of these cosmic batteries? Imagine having a device that could power entire cities with energy we can't even see. Sounds like sci-fi? Well, buckle up - the race to harness dark energy storage devices is heating up faster than a quantum reactor at full tilt. With the global energy storage market already worth \$33 billion In this video, Learn how to acquire the Energy Storage Device and unlock the Research Terminal as part of the "An Eye for An Eye" quest in Genshin Impact. Follow these steps: Collect three Energy Storage Devices, marked on the map. In this video, Learn how to acquire the Energy Storage Device In this guide, we will tell you how to get an energy storage device and unlock the research terminal in Genshin Impact. When we did the quest, this subtask took a few minutes to complete. To complete the task as quickly as we did, follow the instructions below. As we mentioned above, this task will Follow the steps below to complete this logistically-confusing puzzle.
