

## new energy storage power station executives

Will new energy storage drive China's Energy System Transformation? New-type energy storage, such as electrochemical energy storage and hydrogen storage, is poised to drive China's broader energy system transformation, alongside economic benefits, powering the nation's economic engine and ushering in an era of unprecedented energy independence and sustainability, they said.

Is the energy storage industry achieving scaled development? With the performance of lithium batteries significantly improving over the past few years and the iteration of multiple technology routes accelerating, the energy storage industry has achieved scaled development, said Chen Haisheng, chairman of China Energy Storage Alliance.

Who signed CSG energy storage agreement? Witnessed by Liu Guogang, Chairman and Party Secretary of China Southern Power Grid Energy Storage Co., Ltd. ("CSG Energy Storage"), and William Li, Founder, Chairman and CEO of NIO, Wang Zhiqiang, Chairman of CSG Energy Storage Technology, and Shen Fei, Senior Vice President of NIO, signed the agreement.

What is the implementation plan for the development of new energy storage? In January, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Are independent energy storage stations a good investment? This does not augur well for the market in terms of long-term competition. There will be safety risks associated with excessive cost control and an indifference to quality. Independent energy storage stations enjoy good long-term prospects, though this segment is sluggish in the short term.

How much money did energy storage companies raise in 2023? In 2023, they accounted for 90% of global energy storage-related fundraising deals (China for 46%, the US for 31%, and Europe for 13% respectively), raising USD 2.9 billion, USD 2 billion, and USD 800 million, respectively (Figure Company News On July 14, 2023).

Great Power signed a demonstration project of 5MW/10MWh Sodium-ion Battery Energy Storage Power Station with Energy Storage Power Station Built Instead of Tiangeng Holding

At present, the state has established a capacity electricity price mechanism for pumping storage and thermal power units, but the new energy storage has not yet had any capacity support

New energy storage key to spur economy

New-type energy storage, such as electrochemical energy storage and hydrogen storage, is poised to drive China's broader energy system transformation, alongside economic

China to supercharge energy-storage tech with world 1st; New plan calls for expansion of energy-storage applications, including more projects in desert areas and at retired coal-fired power plant sites.

NYCEDC Advances Green Economy Action Plan with Unlocking additional storage capacity will ultimately underpin a stronger and more efficient renewable energy sector.
