

romania pumped storage project planning announcement

Is Romania preparing a feasibility study for a pumped hydropower project? The Romanian Ministry of Energy said this week that state-owned energy company Societatea de Administrare Participativa a Energiei S.A. (SAPE SA) is currently conducting a feasibility study to resume the development of the Tarniș-Lăpuș pumped hydropower project on the Someșul Cald River in Cluj County, northern Romania. Does Romania have a battery energy storage plan? In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's northwest has flipped the switch. How will Romania grow its energy storage fleet? Romania aims to exponentially grow its energy storage fleet over the next couple of years, as it works on its plan to deliver 36% of the nation's energy to come from renewables by 2030, with 8.3 GW of solar and 7.6 GW of wind, and phase out coal by 2035. Given that the 50-year-old project of the Tarniș-Lăpuș pumped-storage hydropower plant, at the tender level for the feasibility study organized by the state company SAPE, is not moving forward, the Minister of Energy announced a "plan B" of what called in the past "my soul project". The Romanian Ministry of Energy initiated market consultations for the Tarniș-Lăpuș pumped storage hydropower project, aiming to commission a feasibility study. The Ministry of Energy has commenced market consultations for the Tarniș-Lăpuș pumped storage hydropower project on the Someșul Cald River. In its first, the Romanian government has allocated EU funds for two major battery energy storage projects via its National Recovery and Resilience Plan. A utility-scale solar-plus-storage site in the country's northwest has flipped the switch. Meanwhile, the nation's landmark pumped storage hydropower project, Romania is resuming the development of the Tarniș-Lăpuș pumped hydro storage project, with a planned capacity of 500 MW to 1 GW. It will be the first installation of its kind in the country. Image: ?etcu Mircea Rare?, Wikimedia Commons The Romanian Ministry of Energy said this week that Romania's Ministry of Energy, through the Energy Participation Management Company (SAPE), has initiated the Tarniș-Lăpuș hydroelectric pumped storage project. In response to the public tender process, two companies have already submitted their bids. "After years of waning confidence in this project, Romania expects its overall energy storage to amount to at least 2.5 GW in operating power at the end of 2025, and to expand to as much as 5 GW a year later, local media reported, citing Minister of Energy Sebastian Burduja. These ambitious energy storage targets are aligned with transmission line investments. ROMANIA: "Plan B" for the Tarniș-Lăpuș pumped storage project Given that the 50-year-old project of the Tarniș-Lăpuș pumped-storage hydropower plant, at the tender level for the feasibility study organized by the state company SAPE, is not moving forward, the Minister of Energy announced a "plan B" of what called in the past "my soul project".
